Mar. 20, 1924.

Send Orders to Ferguson Seed Farms Inc., Sherman, Texas.

No. 443

To The Seed Dealers of The Southwest:

By comparing our dealers prices with our Retail prices, given in "Fergusons Seed Current," you will note that you have a liberal margin of profit. We suggest that dealers sell at our regular retail price, plus freight charges, except on cotton seed, which we quote freight paid to Texas and Oklahoma points.

We sell retail mail order because there are hundreds of communities not served by local seed dealers, and thousands of farmers in these communities plant Ferguson's Pedigreed Seeds every year. Wherever possible, we sell thru dealers who stock our seeds, and buy in wholesale lots.

Grades And Classes Of Seeds. We quote Ferguson's Bred-Up seeds by "Strains and Varieties" based on Pedigrees in breeding, and other seeds by "grades", based on purity, maturity, soundness and germination.

Ferguson's Breeding Block of New Boykin Cotton, Photographed February 6, 1925.

This is on one of the oldest farms in Grayson County, being patented in 1837. Its naturally thin land and the season was dry, as the small size of the stalks indicate, yet the average yield is about two thirds of a bale per acre, after being open 6 to 7 months. The large bolls still remain **99% Storm-Proof, and Easy to Pick.** Adjacent Cotton was entirely harvested in one picking in November-December, making 38-42% lint turnout. This Breeding Block has been visited by more than 1000 persons during the fall and winter. The gentleman in the dark suit beside Mr. Ferguson is Mr. E. N. Boykin, who came to see the Breeding-Block of this cotton originated by Ferguson Seed Farms, and named to honor his father, Mr. W. L. Boykin, a pioneer seedsman.

PRICES And TERMS:

Prices on field and garden seed are f. o. b. our stations, unless otherwise noted. Broken bags or packages at slight advance in price. Prices subject to change and quantity discount. Orders filled at prices in effect day order is received unless otherwise instructed. Burlap bags free. Cotton bags at value.

Terms. Cash with order or c. o. d. unless otherwise arranged. All accounts or claims resulting from sales are payable in Sherman, Texas.

FERGUSON'S STRINGLESS GUARANTEE of "Satisfactory Seeds or Money Back,"

just as given in our Catalog, applies to every pound of seeds we sell. We do not guarantee crops, but you are made sole Judge and Jury of the quality of the seeds and your own satisfaction. Catalog free to you and your customers.

Ferguson's Little Seed Store

Sell Ferguson's Garden Seeds in Pkts.

MAKE 100% PROFIT ON YOUR SALES

Ferguson's Southwest Seed Case No. 1 of Garden and Flower Seeds is filled with Tested Seeds of good varieties for the Southwest. The attractive Lithographed and plain packets are filled in our seed rooms from our Selected Tested Stocks. The retail value is \$25.00. Price to merchants only \$12.50 cash. No extra charge for the case.

EXTRA PACKETS of selected varieties, or "Re-Fills" for popular selling varieties, are furnished promptly at the following prices, cash with order:

5c. Pkts—100 Pkts, \$2.50. Less Quantities 3c each.
10c Pkts—100 Pkts, \$5.00. Less Quantities 6c each.

We Protect You From Loss on Unsold Seeds, if you will return your case with unsold seeds, prepaid in October. We will credit the full value of the unsold packets on the purchase price of a new case for the following season. We will refill your case with fresh tested new seed and forward to you in January, charging you only for the difference. We do not want you to sell "carried-over" seed of doubtful value in Ferguson's packets. This method protects you from loss and assures your customers of fresh seed at all times. Ferguson has a pride in rendering real "Seed Service" to the Southwestern Farmers and Gardeners.

We Do Not Offer "Commission Boxes", generally handled. Such boxes allow only 30% to 40% on sales. Most of them are put up by northern concerns, with little knowledge or attention being given to the requirements and needs of Southwestern conditions. If you have handled these boxes in the past you will remember the large number of varieties you had no call for and the large amount of seed remaining unsold at the end of the season. This big "carry-over" does not make you any profit. Neither does it make a profit for the company putting them out. Someone has to absorb this loss. The merchant stands his share in smaller profits and the customer stands his part of it in the decrease in the size of the packets, or poorer quality of the seeds. Some companies get around this difficulty by charging double price for their packets.

"Seedsmen to The Southwest" for Twenty-five years has taught us something about the needs and requirements of Seed buyers in this climate. Ferguson's Seed Cases are made up of varieties that sell.

Send in your order TODAY.

Ferguson's Pedigreed Field Seeds

Ferguson's Bred-Up Pedigreed Seeds are grown from Ferguson's High-Bred Strains, as well as Harvested, Threshed, Ginned, Re-cleaned, Graded and Sacked under the direct supervision of Ferguson and his staff.

Ferguson's Pedigreed Seeds are Sold only in Branded Sealed Bags.

Ferguson's Bred-Up Cotton Seed

NEW BOYKIN. The proven highest linting, big bodied, storm-proof, highest yielding strain ever developed from Mebane Triumph Cotton. Makes better gin turn-outs and higher yields than the original Mebane Triumph, Kasch's Triumph Etc. These statements are proven by numerous Government Experiment Station Tests, and farmers experiences in their own fields.

FERGUSON TRIUMPH NO. 406. is quite similar to NEW BOYKIN in field characteristics and in early rapid fruiting habits, but produces a slightly better quality of staple, often bringing a premium when sold through the Farm Bureau Cotton Exchange. Like NEW BOYKIN, it too, usually yields 100 to 300 pounds more per acre than the originators latest strains of Triumph. See catalog for the figures giving the proof. Many communities are standardizing on this strain to the almost absolute exclusion of other varieties. It's Ferguson's latest creation in a new variety of Triumph Cotton. Discovered in 1914. Introduced and popular since 1918.

Lower Prices on Quantity Orders Ferguson's Pedigreed Cotton Seed.

By buying in quantity or wholesale lots for re-sale, you get the advantage of our low prices, and make a substantial profit. Ferguson's three varieties are quoted in two grades as described below, **FREIGHT PREPAID** to Texas and Oklahoma points.

The Dealer's Discount on cotton seed is 25 cents a bushel below Ferguson's Retail Prices quoted below. This is equal to 50 a bushel, or \$2.00 per sack profit on orders for 56 bu. or more. Special prices on car lots.

FERGUSON'S RETAIL PRICES ON COTTON SEED are for sack lots, 4 bushel bags, Freight Prepaid to Texas and Oklahoma Points, and fob our Stations for other states. The extra cost of complying with Federal and State quarantine regulations offsets the freight allowance to our Texas and Oklahoma customers.

Texas Red Rust Proof Seed Oats.

Our Pedigreed Seed Oats are entirely sold out for this season 1924-25 and to meet the demand for good planting seed for next spring, we are offering an exceptionally fine lot of **Selected Texas Red Rust Proof Seed Oats.** These oats have been raised in Grayson County for a great many years by the growers from whom we obtain our supply. The fields were usually inspected while growing to note their freedom from Johnson Grass and other noxious weeds, and the purity and quality of the stock. They are all re-cleaned and graded, which means that the light oats, pin oats, sticks and trash are removed. They are then treated for smut with formaldehyde in order to keep this blasting disease from robbing you of from 3 to 10 bushels per acre in your crops. In fact, they are prepared and treated just as carefully as our Pedigreed Seed Oats and no better stocks of Texas Red Rust Proof Oats can be found anywhere. Sacked in unsealed plain 5 bushel bags.

Ferguson's Bred-Up Seed Corn

Ferguson has spent 24 years in corn breeding work. His three varieties of corn are recognized as "Standard for The Southwest" by all authorities. Experiment Station tests and farmers experiences in their own fields in Texas, Arkansas, Louisiana, Mississippi and New Mexico prove that FERGUSON'S YELLOW DENT, CHISHOLM and SURCROPPER, (all originated by Ferguson) make biggest yields and better quality crops. Ferguson's varieties of corn were originated, Bred-Up and improved to meet the conditions of soil and climate in the Southwest. They yield 10 to 25 bushels more per acre than northern grown varieties.

DEALER'S PRICES are quoted net, fob Sherman below. See Ferguson's Seed Current for our Retail Prices.

	Per bu. in 2 bu. Sealed Branded Bags

Ferguson's Selected Seed Corn

To meet the demand of some customers who do not yet realize the advantages of planting Ferguson's Freshly Improved Strains of Standard Varieties of Seed Corn each season, and prefer to buy cheaper seed than Ferguson's Pedigreed Strains, (quoted above) we offer other varieties of Corn and stocks of Ferguson's varieties grown by customers who buy their seed from Ferguson. These grades of Seed Corn are not sold as Pedigreed Seed, but are carefully hand nubbed and butted, re-cleaned and graded.

Ferguson's Pedigreed Seed Oats

FERGUSON'S NO. 922 OATS. Ferguson's latest improved variety of Red Oats, originated from a selection made from FERGUSON NO. 71 OATS. Offered for sale for the first time this season. Main supply sold out in October. Small surplus at present. While they last, \$1.65 per bu., 1 to 20 bag lots.

We are now booking orders against next year's crop.

FERGUSON NO. 71 OATS. Ferguson's proven high-yielding, Pure Bred, Pedigreed strain of Texas Red Oats, which since their origin and distribution have regularly made highest yields in the Experiment Station tests and in farmers fields throughout the Southwest. Our supply practically sold out for this season. Very small surplus at this time. \$1.45, 1 to 20 bags lots, subject to being unsold. If you are an oat grower, it will pay you to ask for prices and additional information about "Ferguson's Seed Oats".
